Alexander Hamilton pages:

Look at this beautiful painting of a man. This particular man is the one who started Silk City. He has a great name. His name is Alexander Hamilton.

Long ago, all the people in Silk City worked in the factories and mills that Alexander Hamilton helped to build. A lot of the mills made silk, and that's why this city has the nickname of Silk City.

On Silk City's flag there's a picture of a boy planting a mulberry tree, because mulberry trees go into making silk. And there are mulberry trees all over the city.

(Paterson teachers: I can think of two places where we can find Alexander Hamilton. Do you know where that is? Hint: his is looking at the Waterfalls downtown. He is a statue!)

2. He is also on a piece of paper that we like to have. He's on a five dollar bill! Let's look at the Flag or the Seal of Silk City. There is the boy planting the mulberry tree. Let's find a mulberry tree in our neighborhood. Bring in a leaf.

(Paterson teachers: This painting of Alexander Hamilton is in the Metropolitan Museum of Art, in the American Wing. The Metropolitan Museum of Art was able to become a great museum because a Paterson locomotive manufacturer, Jacob S. Rogers, gave \$5 million to the museum in 1902. The Rogers Fund is used to buy art of all kinds for the museum. Go to the Metropolitan Museum and find items purchased by the Rogers Fund. They are everywhere, and are every Patersonian's link to a great museum.)

Lesson 1 Wind pages

Let's begin our story. It was a very windy day in Silk City. All the people who live and work in Silk City lost their hats that day. The hats blew high into the air.

What do you know about these hats? Can you tell who the hat might belong to?

A Boy Named Wit, pages 10-11

Here is our friend named Wit. Wit likes to wear a pointed hat. He calls it his Thinking Cap.

Thinking Cap pages 8-9

Wit's Thinking Cap lights up whenever he has a bright idea.

Mulberry Tree pages 14-15

On this Windy Day in Silk City, Wit and his friend the cat, Mitt'ns, met in their favorite junkyard underneath the mulberry tree. They had something to talk about.

Junkyards are treasure houses and tell us a lot about our city and its occupations.
Visit one, but be careful.

Silk City Bee pages 16-17

There was a big story in the newspaper about a mysterious inventor who was going to make flying candy. Wit read the newspaper story. It says: (read the page). The newspaper also has a funny cartoon in it.

Many years ago in Paterson, there was a newspaper called the Bee. What is the name of our newspaper today? Find a story or picture you like in the newspaper and bring it in. Tell why you like it.

Kite in the Air pages 22-23

Wit and Mitt'ns heard a bird singing and looked into the sky. They saw their friend the bird Twitter. Twitter was telling them about a mysterious kite flying in the sky. Twitter sang, "Do you believe it? Do you hear it? Do you see it?"

Do you see birds in your neighborhood? What do they look like? What do they sound like?

Make a kite from the lessons in Squeaky Chalk, and fly it.

Kite Chase pages 24-25

Wit and Mitt'ns ran through the town, following the kite.

<http://www.joysikorski.com>

Here, here pages 26-27

The kite was flying behind the trees. From up high, Twitter saw where the kite was going. It was going to the waterfall in the middle of Silk City. Twitter called out, "HERE HERE OVER HERE!"

Does anyone know where this waterfall is? Have you been to see it? Collect pictures of the Great Falls. For a class trip: all go and visit the waterfall.

Tam O Shanter pages 28-29

In front of an old mill building at the base of the falls was Professor Thistle. He was wearing a Scots hat, the Tam O Shanter, and he was testing the wind with his kite. Wit asked Professor Thistle to tell him more about flying candy, but all Professor Thistle said was, "Wait and see."

Different countries have different languages and costumes. Learn some words from different languages, and study hats.

The Scots were very influential in founding many towns and cities. Study Scots.

Mulberries pages 42-43

Wit, Mitt'ns and Twitter couldn't find out anything more about flying candy. They soon forgot about it, and spent their days doing what they pleased, playing near the junk yard and eating mulberries.

Has anyone eaten a mulberry?

Drawing at night pages 44-45

Wit liked things that fly, and he liked drawing, and he liked all kinds of lights. One night he had a bright idea. He tried drawing fireflies at night by the light of a flashlight

Has anyone seen a firefly? What is it? What makes it glow? Can you draw in the dark? Can you color in the dark? Do the colors look the same in the light?

Museum pages 48-49

One day Wit and Mitt'ns saw a poster about a Wild Cat exhibit and decided to go to the Silk City Museum.

Hubcap pages 50-51

They liked to go to the Silk City Museum, but they didn't like going past the fence with the bad dog.

Hall of Apes pages 52-53

They ran quickly past the bad dog and into the wonderful Silk City Museum of This and That, where the first exhibit is the Hall of Apes. And here is a cute ape, who looks soft and fuzzy. His fur is white. Maybe he is one of those apes from Japan, who lives in the snow.

Look up all kinds of apes. What is a museum? Have you been to many?

Hall of Prickles pages 54-55

There are lots of things to see in the Silk City Museum. There's the Hall of Prickles, about all things prickly.

Collect and exhibit prickly things, soft things, etc. Start a museum.

Docent pages 56-57

The Docent was in the Silk City Museum as usual. A Docent is a helper who tells you lots of interesting things about the museum. Today she was talking about Pterodactyls. She said, "Some pterodactyls had 15-foot wingspans. Others were as small as Twitter birds."

Apatosaurus pages 62-63

The Docent continued through the Hall of Dinosaurs. She told Wit something interesting about chalk. It is made of ancient sea creatures. People didn't know that dinosaurs lived a long time ago until they found dinosaur bones buried in a very old chalk quarry in England. The Docent also told Wit how to make chalk fizz and disappear.

What is a quarry? It's a place where you dig to find minerals, gems, and other buried things.

Find Professor Huxley's lecture "On a Piece of Chalk," and glean information from it.

Try the Docent's chalk experiment.

History Garden pages 68-69

In the Silk City Museum is a History Garden, with statues of all the great inventors who built things in Silk City. What do we see? Aircraft Engines, Locomotives, Submarines, and Silk. "Silk City will soon boast of Professor Thistle's new invention, Flying Candy!"

Wild Cats Exhibit pages 70-71

Let's not forget the reason we came to the Silk City Museum, the Wild Cats and Pussycats Exhibit. Mitt'ns saw himself in the mirror, and then Wit and Mitt'ns studied a ferocious tiger.

Wing Rings pages 76-77

After a visit to the Museum Gift Shop, ..(turn the page...)

Fence Shadows pages 78-79

Wit and Mitt'ns left the museum to head for home. It was late in the day and the shadows were long, making stripes fall across Mitt'ns, almost like a tiger. ROAWRRRR!

Study shadows of all kinds, at different time of day.
Make some shadows and trace them.

Hubcap & Shadow pages 80-81

When Wit and Mitt'ns came to the bad dog, Mitt'ns had a bright idea! Shadow stripes made him look like a tiger, and he scared the bad dog! HMMMmm HMMMmmm HMMMmm says the dog. "Could it be that Mitt'ns, a cat born in the junkyard, is descended from the tiger?"

Autumn Leaf pages 86-87

After Summer comes Autumn, or Fall. The bad dog was asleep in his junk yard, and Wit started school in the fall.

A Girl Named Patience pages 88-89

At school we make new friends. Wit made a new friend that year. Her name is Patience.

<http://www.joysikorski.com>

Patience pages 88-89

And here is Patience. She has beautiful hair!

Mulberry Festival pages

Fall is also the time for festivals. Silk City had a big Mulberry Festival, celebrating the mulberry tree. There was an art exhibit, a design contest, and a Cake Walk. The whole city celebrated. And here is a map of Silk City.

What do we see in the map of Silk City? (Paterson teachers: The Lenape River is the Passaic River. Lenape Indians once lived here. L'Enfant Falls is the Great Falls. Paterson's street plan was designed by Pierre Charles L'Enfant at the same time that he designed Washington DC, 1792. The Tartan Sweet Candy Company is the Colt Gun Mill, on what is known as the ATP Site, the place where the water raceways and canals came from the falls and powered the earliest mills.)

Dig a Hole pages 104-105

As part of a school program, Wit, Mitt'ns and Patience did some archeology for the Silk City Museum, and uncovered toys that children of Silk City played with long ago.

(Paterson teachers: You will see these toys among the Dublin artifacts in the Paterson Museum.)

Project: Bury an old toy. Make a time capsule.

Bubble Lesson pages 108-109

Suddenly, soap bubbles begin to drift down out of the sky. High above them, Wit, Mitt'ns and Patience see Professor Thistle the inventor in hot air balloon in the shape of Pegasus, the flying horse.

Make soap bubbles. Study their reflections and their flight indoors and out.

Smoke Lesson pages 112-113

Professor Thistle says, "The bubbles show that my Pegasus Candy will fly on the wind." Twitter is flying up above them in the smoke from the flying machine, singing, "MADGE MADGE MADGE PUT ON YOUR TEA KETTLE ETTLE ETTLE!"

Bubble Jam pages 104-105

The entire Silk City is flooded with soap bubbles!!! It's a bubble jam! BEEP BEEP! EEEK! HELP!

Silk City Bee pages 116-117

In the newspaper there are many stories about recent events. (Read the paper.) And of course there is an interesting and thought-provoking comic. Don't forget to read the weather report.

Snow pages 118-119

The weather grows colder, and fall turned to winter in Silk City.

Weasel Mountain pages 128-129

Wit and Patience take their sled up Weasel mountain for a ride. Mitt's comes along. When they get near the top, they see Professor Thistle in his balloon again, this time towing a banner in the sky. What does the banner say?

Twitter is there too, singing, "WHERE WHERE ALL TOGETHER DOWN THE HILL!"

Does our town have a mountain? Have you ever been there? (Paterson teachers: Weasel Mountain is the old name for what is now called Garret Mountain. Visit the nature center on the top of Garret Mountain and look through the telescope at Silk City below.)

Sled pages 132-133

Wit, Patience and Mitt's hop onto their sled and down they go! Faster and Faster! FASTER AND FASTER! FASTER AND FASTER! Then.... They hit a bump!

Mogul pages 134-135

A snow bump going downhill is called a mogul. This one was made by a bear sleeping under the snow. BUMP! Hey! Wit, Mitt's and Patience fly into the air.

At the Bottom pages 136, 137

They land in a heap at the bottom of the mountain. (Read from the pages)

Pegasus Candies were flying everywhere pages 138-139

(Read aloud from the pages)

What are the people doing to try to catch the candy?
Thinking time: How would you catch the flying candy? What could Professor Thistle do to make it easier to keep?

Silk City Bee pages 140-141

There was a big article in the Silk City Bee the next day, reporting on the goings-on. (Read the paper.)

There was also an interesting article about some clouds that were seen in the shape of animals. And don't forget to read the weather report.

Go cloud watching. Read Robert Burns poem about a mousie. Look at Vik Muniz's art, and make some like it.

Professor Thistle abandoned his invention pages 142-143

(Read from the page.)

Parachute pages 144-145

Looking down from the balloon, you can see the Falls, the Submarine, and the Colt Gun Mill, which was made into a museum. It's a lovely view! Unless you don't like to fly. Mitt'n's doesn't like to fly. (Read from the page.) What do Wit and Patience do to help Mitt'n's?

This is a view of the ATP Site, made into a wonderful museum and park.

Squeaky Chalk instructions pages 146-147

Down he floats in a basket with a big parachute. Twitte guides the way. Can anyone think of what Twitter might say? Raise your hand. (If nothing, then you say, DOWN HERE! DOWN HERE!)

Try coloring with pastels.

Silk City Scrap pages 152-153

The wind blows gently, Twitter keeps a careful watch over his friend, and Mittn's floats safely back home to the Silk City junk yard that he loves.

And that is the end of the story of SQUEAKY CHALK.

Daffodils are coming up, and the mulberry tree is getting new leaves. Do you know what time of year that means?

After Reading, You can Draw

Distribute paper and crayons. Prepare in advance a set of photocopies of drawing lessons from the book. Have each child come and pick a drawing lesson, take it to his or her place, and draw from it. When the children finish one drawing, they bring that drawing lesson back and exchange it for another. This activity goes on until the class time period is over.

Wing Rings

Photocopy the Wing Rings pages and cut them out and assemble to make wing rings and bracelets. For children with fatter or thinner fingers, Draw your own Wing Rings with longer or shorter bands than the ones in the book, and cut those out and assemble.

Show the book:

The name of this book is Squeaky Chalk. Joy Sikorski wrote it and she also drew all the pictures. What do you call a person who writes a book? An Author. And a person who makes the pictures? An illustrator.

Squeaky Chalk is a book about a city. What is the name of our city? (Paterson, New Jersey.) Our city has a nickname, does anyone know (Paterson's) nickname? (Silk City.)

Show SQUEAKY CHALK title page:

Squeaky Chalk we meet Twitter, a bird. We meet Wit, a boy. We meet Mitt'ns, a cat.

Pages 6-7, O.

This book also will show us how to draw. Does everyone know what this letter is? Oh!

If you know how to make letters, you already know how to draw. With this oh you can draw a piece of chalk. What do you think these lines mean? They mean that this chalk is squeaking. SQUEAK!

Alexander Hamilton pages:

Look at this beautiful painting of a man. This particular man is the one who started Silk City. He has a great name. His name is Alexander Hamilton.

Long ago, all the people in Silk City worked in the factories and mills that Alexander Hamilton helped to build. A lot of the mills made silk, and that's why this city has the nickname of Silk City.

On Paterson's flag there's a picture of a boy planting a mulberry tree, because mulberry trees go into making silk. And there are mulberry trees all over

the city.

Lesson 1 Wind pages
